

Electronic Driver Vehicle Inspection Report (DVIR)

Coordinate drivers, mechanics and safety supervisors with better accuracy and timeliness.

Regulations require operators to create and maintain records relating to vehicle safety. Learn about how Routeware is making compliance easier, which also means more efficient operations.

DVIR allows drivers to record all required vehicle and safety checks during pre and post-trip inspections. Mechanics can sign into any tablet to review inspections and record repairs across the entire fleet.

Electronic DVIR (eDVIR) makes inspections easier for drivers and mechanics.

Encourages more careful inspections and prevents "pencil-whipping."

Consolidate vehicle safety information with other systems.

Back office access for painless inspections wherever they happen, on the road or otherwise.

Track changes and fleet performance more effectively than with paper or stand-alone systems.

"Lexington paid for the entire Routeware system via cost savings within the first year and has expanded use of Routeware into two additional divisions."

Eddie Dean, City of Lexington, KY
