

Integrated Technology for Waste & Recycling

Achieve fleet & community engagement goals by digitizing every stage of the waste lifecycle.

Smart Fleets & Communities

One software to run your entire waste lifecycle! Comply with laws and regulations, balance budgets, increase fleet productivity, and provide excellent community service.

Easily integrate and add solutions as you need them. Whether you want to enhance your existing technology stack or build a new one from scratch, Routeware has got you covered.

Routeware has been digitally transforming the waste and recycling industry for over 20 years.

Our mission is to help waste and recycling operators use technology to delight customers, improve operations, and protect our planet. Routeware solutions are used by over 1000 smart cities and haulers in every US state, across Canada, and in the United Kingdom, benefiting over 100M people.

Tailored specially to your needs

Digital Technology Solutions Built For Solid Waste

Routeware provides a single technology solution across the waste and recycling organization.

On-Board Computers

Help drivers be safer and more productive with in-cab units, smart sensors, and cameras on your trucks and a back-office portal to manage day-to-day activity and analyze organizational performance.

Integrated Video

Get real-time and recorded video directly from your trucks to help supervisors and customer service teams reduce go-backs, improve customer service, and exonerate drivers to reduce insurance pay-outs.

Route Optimization

Design more efficient routes that require fewer trucks and drivers and use less fuel to help cut service costs, reduce carbon emissions, and reduce the risk of service disruption.

New Home of ReCollect

Outreach and Education

Use digital tools and apps to engage people effectively and drive behavior changes that help increase participation, reduce contamination, and decrease phone calls and other administration costs.

Compliance and Sustainability

Simplify your solid waste and recycling program's waste reduction and outreach efforts with the Recyclist Program Tracker. No more struggling with spreadsheets and paperwork. Our cloud-based record keeping and reporting system makes it easy to track progress, keep information up to date, keep your team on task, and see results in real time.

Enterprise Management

Simplify processes and data flow across your operations and finance team with an easy-to-use, all-in-one solution for customer management, routing, reporting, billing & accounting, commerce, and customer self-service.

Your Journey with Routeware

Consulting

Our consulting process starts the moment we have our first call with you. We listen, ask deep questions about your programs, and get a full understanding of the complexities for your programs.

Onboarding

You're busy and need to get up and running fast, and our team is here to help you do just that. It all starts with discussing and solidifying your goals, and understanding how your programs are structured with a kick-off plan and efficient onboarding process.

Enablement

Once onboarding and quality assurance is completed, we work together to ensure your organization is trained to get the most out of your tools and begin to see value from them on day one. We capture benchmarks and track success for you from the very beginning.

We also hope you'll begin to join our Community by attending webinars and utilizing our Help Center.

Adoption

Once your technology is live, it's time to promote and bring awareness to them. Together we'll ensure you're set up for success to prove value and begin building adoption. Our Customer Success Team will work with you to craft a personalized success plan and review progress during regularly scheduled check-in calls.

Optimization

Throughout your journey with Routeware, our team works side-by-side with you to recommend best practices and features that can help you continue to grow and optimize your tools. Through account business reviews, we can align usage with your goals and determine any gaps. Your valuable feedback throughout helps inform our Product Roadmap and customer experience, as well.
